FOR IMMEDIATE RELEASE

May 25, 2007

Borman Expressway/I-65 interchange improvement on track

The north-west ramp will be closed the early mornings of May 30-31 during bridge work

GARY, Ind. - The Indiana Department of Transportation (INDOT) reports the Major Moves New Construction interchange improvement project at Interstate 65 and Interstate 80/94 (Borman Expressway) is successfully moving into its next phase.

Construction began in April and is scheduled for completion in the summer of 2009. This contract – the first of three – involves the construction of new ramps from northbound I-65 to westbound I-80/94 and eastbound I-80/94 to southbound I-65, as well as I-65 reconstruction and the rehabilitation of three bridges within those areas.

Work recently completed includes:

- A shift of traffic on southbound I-65 – from the eastbound I-80/94 ramp to southbound I-65 to Ridge Road – toward the median so excavation work for road widening can progress.
- Continued installation of temporary widening and continued excavation in preparation for road and retaining wall construction.

Over the next two weeks, work by contractor Walsh Construction includes:

- During the week of June 4, traffic will be shifted to temporary widening on the northbound I-65 to westbound I-80/94 ramp
- During the week of June 4, traffic will be shifted to temporary widening on the eastbound I-80/65 ramp to southbound I-65
- Closure of the northbound I-65 ramp to westbound I-80/94 ramp while support beams for widening work are installed on the I-65 southbound bridge passing over the ramp

When the support beams are moved, the north-west ramp will be closed from midnight to 5 a.m. May 30 and May 31. Message boards will direct traffic to take the posted wide load detour to reach westbound I-80/94. The detour directs traffic to take I-80/94 east for approximately 2 miles to State Road 51 (S.R. 51) north to westbound I-80/94 via the clover leaf ramps.

Continuing are the ramp and wide-load restrictions.

Until projected completion in November 2008, the ramp from northbound I-65 to westbound I-80/94 is restricted to one lane with an 11-foot width restriction. A posted wide load detour directs traffic on northbound I-65 wanting to travel west on I-80/94 to take I-80/94 east for approximately 2 miles to State Road 51 (S.R. 51) north to westbound I-80/94 via the clover leaf ramps.

Until projected completion in November 2007, the ramp traveling from eastbound I-80/94 to southbound I-65 will be restricted to one lane with an 11-foot width restriction. A posted wide load detour directs traffic on

eastbound I-80/94 wanting to travel south on I-65 to continue east on I-80/94 for approximately 2 miles to S.R. 51 north to westbound I-80/94 to southbound I-65.

The speed limit has been reduced to 45 mph on the interstates and to 40 mph on the ramps through the work zone. INDOT reminds drivers to use caution and keep in mind worker safety while driving through construction zones.

Future work to take place this summer will include restrictions on the Ridge Road ramps to and from I-65. More information will be announced as construction progresses.

Major Moves fully funds a decade of critical highway projects in Indiana. When Major Moves is complete in 2015, more than 200 new construction and 200 major highway preservation projects will have been built. Major Moves capitalizes on Indiana's strategic location at the *Crossroads of America* by building a superior road infrastructure. This innovative plan will bring jobs to the Hoosier State and leave a legacy for Indiana to be a global leader in distribution and logistics.
